Ashley Bander, CSIS
- 4:15 pm – Consequences of the Gaps
- Loss of U.S. Leadership by 2014
 - Dependence on Russia
 - Underutilization of the ISS
 - Delay of the Lunar Program
- 5:00 pm – Close

¹ NASA participated to present information about NASA’s current programs during the first meeting and associated question-and-answer session that followed. NASA did not participate in the dialogue to consider alternatives nor in the writing of the report during the second session. As such, this does not denote a NASA endorsement of the CSIS report, but rather captures NASA’s effort to provide current factual information to the group.
